SUMMARY

I am a full stack developer with over a year's experience working with frontend and backend technologies to build scalable and fast websites and web apps. My current Teck stack includes; HTML, CSS, Tailwinds, Post CSS, JavaScript, Typescript, React NodeJS, Express, PHP, Laravel, Git, Kubernetes and more.
I am experienced in Test Driven Development (unit / Integration), MVC design pattern, separation of concerns, and the application of standard coding principles (e.g., the DRY and KISS principles).
I wish to work for an encouraging and stable company that will assist me in developing, improving my skills in order to become the best engineer I can be.
